Adding to this the bullets that were removed from the TA that should likely be included when this is sent over.

Chemicals that were designated active on the February 2019 TSCA Inventory and were subject to a 5(e) or 5(f) action are listed across two tabs, one listing only non-CBI chemical substances identities and one listing only sanitized CBI identities ("Draft Leg Named Chems Related" and "active & CBI (sanitized)").

- A substance would not be on the TSCA Inventory if it was reviewed in a PMN but has not been put into commerce, which would require providing a Notice of Commencement of Manufacture or Import (NOC) within 30 days of commercialization or the substance was not submitted for review in a PMN.

PFAS TRI Team – I'm forwarding the TA that went to SEPW and Sen. Capito staff on PFAS and TRI. The TA states that we will provide an additional document with a list of chemicals. My understanding is that the program is doing a final quality check on the list and we expect to be able to send it to the requesters on Monday. Please let me know if any questions. Thanks,  
Sven
